Policy Document On Environment and Energy Usage

The Policy on Environment and Energy Usage of Shyamlal Pandviya Government P.G. College, Morar, Gwalior, M.P. is a systematic way to minimize its impact on the environment. The policy implies to explore the alternate sources of energy. It will of help to embed efficiency and environmental awareness in our everyday activities, and thus helping to realise our responsibilities and commitment to conservation of natural resources . Environment club and Eco Club which are operational in this college shall be utilised for efficient implementation of this policy.

Policy

- To assess our energy usage and measure its impact on environment;**
- To reduce local air pollution using no vehicles in main campus and use of pedestrian friendly roads ;**
- To make efforts for solar energy uses;**
- To replace all old sources with efficient LEDs;**
- To develop rain water harvesting;**
- To undertake plantation drives periodically;**

- To maintain already available greenery and develop gardens;
- To take additional measures to continuously improve energy consumptions;
- To paste notices and leaflets in rooms and other places for switching off switches when not in use;
- To make efforts for maintaining resources for efficient greenery and power;
- To include its importance in Code of Conduct;
- To communicate with Government and local self governments in the areas of cleanliness, environment and sustainable development;
- To monitor and respond to emerging environmental and energy issues.
- To promote Environment club and Eco Club operational in this college;
- To arrange workshops/classroom seminars/Seminars for Environment ;
- To review these policy points time to time.

This policy will be communicated to all through notice boards, banners, whatsapp groups and other means e.g. website of college.
